

Mobile Marketing Solutions

GossRSVP Mobile Marketing Solutions provides cost effective Mobile Marketing tools. We offer solutions from a simple text message, to 2d QR codes, to solutions that will integrate with your current business applications. Regardless of your Mobile Marketing needs, we'll get you started and help you grow with scalable solutions.

Just create and place a text code or a 2d code in an advertisement, brochure, article or web page and your customers will have a jumping-off point for value-added content. Additional text, photos, audio, video and landing pages via the Internet are brought directly to mobile phones just by scanning the code.

- **Open an account at www.gossrsvp.com**

- **Use the online system to create your mobile campaign**

- **Use the text or 2d QR code automatically generated for your promotion**

- **Place your code in an advertisement, brochure or web page**

- **Track your campaign with the integrated reporting tools**

- **Use our branding or “white label” the program and use your own branding**

- **With a custom API you can Integrate the system with your business applications**
